

JetSort[®] LX Coin Sorters

Breakthrough speed, accuracy and ease of use

Ensure complete confidence in coin processing

Streamline your processes, increase operator productivity and maximise counting accuracy with Cummins Allison JetSort LX coin sorter. With the JetSort LX, you're assured of accurate, high-speed counting, effective counterfeit detection, easy, intuitive operation and proven reliability for durable, multi-shift performance and maximum uptime.

The compact footprint is ideal for space-challenged areas. The large, adjustable touch-screen display makes the JetSort LX easy to use. Its simple linear format provides fast, easy bag management with minimal operator intervention. A new ergonomic design reduces bending and lifting, optimizing operator health and safety. JetSort LX also features an affordable price to help you manage tight budgets.

Productive, high-speed sorting

With a processing speed of up to 4,100 mixed coins per minute, operators finish work quickly, helping you to achieve your productivity objectives. Fast, on-the-fly coin discrimination sorts with 99.995% accuracy, identifying and rejecting foreign, counterfeit and damaged coins.

Simplified bag management

A quick-release, linear bagging system provides a compact footprint, and allows operators to change bags within seconds to resume processing. Simply pull the lever up to release and remove a full bag, then attach a new bag. LED lights on handle indicate bag status. Auto-bag clearing feature starts motor and resumes counting automatically when bag handle is secured. Each machine holds up to nine in-line plastic or cloth bags or custom styles, while an adjustable shelf supports smaller size bags for optimum bag handling versatility.

User-friendly operation

Key machine functions are all on a large, easy-to-read 381 mm touch-screen display, simplifying operations and providing operators with colourful visual cues and one-touch transaction processing. A pop-up on-screen keyboard makes data entry simple. The display is easily adjustable for optimal height, viewing angle and touch-screen access. Multiple languages are supported, allowing for easy operator training, while LED lights provide bag status.

Reliable and affordable

Delivering the proven Cummins Allison reliability you trust, JetSort LX offers an affordable price to help you maximise your ROI and add substantially to your bottom line.

World class service and support

Our local, in-country support personnel make sure your equipment is up and running. Service technicians are company-trained. Local parts inventories mean repairs are completed quickly and thoroughly so your operation stays productive.

Meeting the specialized needs of Europe's coin-counting industries.

JetSort LX has been developed to help multiple industries meet and exceed crucial coin-counting and coin management goals. In addition to its industry leading speed, reliability and affordability, JetSort LX offers a new ergonomic design that keeps operator safety in mind throughout the entire process.

CIT Security

As a cash-in-transit carrier, you need efficient coin counting and management solutions that offer high performance, high reliability and exceptional affordability to help mitigate shrinking budgets. JetSort LX delivers on every CIT requirement, enabling cash vaults to process group or independent deposits and declared balance deposits. Basic deposit processing allows coin to be separated and reported by denomination. Operators can replace bags quickly and safely.

Vending

After your route drivers collect bags and cash boxes from vending machines, JetSort LX processes them at your centralized facility for exceptionally fast counting and reconciliation. Each machine keeps an accurate record of all coins deposited. Operator efficiency is assured through an intuitive, colour-coded interface. JetSort LX supports both multiple batch and sub-batch processing, with many sub-batches per batch.

Parking

Whether you're part of a car park management company, or a manager in a city or municipality with its own parking collection operation, you'll streamline your processes with JetSort LX. After employees collect the parking fees from coin boxes on parking meters and take the deposits back to your cash center, JetSort LX helps you count, sort, reconcile and bag deposits, offering multiple batch and sub-batch processing. Smooth operations are assured with step-by-step onscreen information.

Banking

JetSort LX delivers fast and cost-efficient recounting and reconciliation of received deposits, enabling tellers to ensure process accuracy. Intuitive data interface allows connection to computers, as well as accessories such as printers, which can print receipts and reports for batch and sub-batch totals. The full-colour touch-screen display helps operators stay on top of the entire process through real-time onscreen bag fill indicators, reject reporting and instructions in multiple languages.

Standard features

381 mm full-colour touch-screen display and adjustable mount, foreign coin discrimination, exact bag stops, 4 locking caster wheels, up to 6 USB ports, many language choices, power-loss transaction protection, COMM protocol for computer interface

Specifications

Machine dimensions: 830 mm wide x 570 mm deep x 1000 mm high (coin-in height)

Configuration: Floor standing with caster wheels

User interface: 381 mm adjustable colour touch screen display

Bag management: Red and green LED lights indicate operating status for each bag station

Operator screen language: Supports English, Spanish, German, French, Italian and Russian

Weight: 120 kg

Power: 105-253 VAC 50/60Hz 4.5/9A

Coins processed: GBP configuration: 1p, 2p, 5p, 10p, 20p, 50p, £1 and £2

EUR configuration: €1, €2, €5, €10, €20, €50, €1 and €2

Foreign coin detection: Offsorts unwanted coin without stopping

Sorting speed: Up to 4,100 mixed coins per minute

Sorting accuracy: 99.995%

Coin input: Gravity feed or lift tray

Coin output: Bags

Coin bags accepted: Plastic and cloth bags of most sizes

Media tracking: Currency, rolled coin; additional custom settings

Individual ID tracking: Up to 400 individual ID totals

Input capacity: Up to 5,000 mixed coins

Data entry options: On-screen keyboard, external USB keyboard, bar code scanner, 10-key numeric USB keypad

Reject box capacity: Up to 300 coins

Maximum number of bags: 8 bags + 1 reject box or bag

Operating system: WIN CE 7.0 or above

Printer – external: Thermal or impact printer (sold separately)

Accessories: Thermal or impact printer, bag support shelf, printer shelf, remote display

Exact bag stops: Standard

Connectivity: Up to 6 USB ports standard

Agency approvals: UL/cUL/EU FCC/CE
