

Transform your branch and enhance productivity

Choose an experienced solutions provider with a dedicated customer-first approach

Transform your branch and enhance productivity

Choose an experienced solutions provider with a dedicated customer-first approach

Cash isn't going away anytime soon. A recent poll determined that 81% of adults in the UK still use paper currency and coins to make purchases at least once a week¹, and Financial Institutions (FIs) are likely to process a significant percentage of that money. Operations with heavy cash volumes, such as cash vaults, need to continually enhance productivity to maintain profits and work toward a more sustainable future.

Today's technologies can go a long way in transforming your branch into an environment that meets the needs of the new branch customer. As roles evolve, technology becomes a support platform for staff. Reliable equipment and superior service are key to increasing productivity and cutting costs.

Your success will depend heavily on the technology partner and solutions you choose.

As an end-to-end solution provider, Cummins Allison is an innovator of new technologies that drive process improvement – expanding our portfolio to provide new options for greater efficiency. Solutions are performance tested under rigorous conditions every day, and meet all ECB certification, PRA and FCA requirements. We train customers personally and remain at your disposal for the life cycle of the product, so you can get the most from your investment.

Make the branch experience as efficient, immersive and meaningful as possible

Local branches remain an important option for people in many communities, for services that are best carried out face-to-face. When branches shift their focus from high-volume, time-consuming transactions, they can reallocate resources to consultative services that better support customers and generate new revenues.

Serve your customers better by enabling employees to work faster:

- Minimise handling of banknotes and coins to reduce employee involvement
- Process banknotes and coin faster for greater efficiency in the vault
- Integrate deposit data from processing devices directly into your systems

Cummins Allison helps FIs optimise cash-handling activities, so operators spend less time on processing tasks and more time with branch clientele.

Boost productivity in the teller line with the JetScan® 150 desktop currency scanner (1.5-pocket)

Studies show us that tellers handle the bulk of transactions that come through the branch. They are your first line of defense – and your best offense. Keep depositors happy by enabling tellers to quickly process their entire deposit in real time.

With JetScan® 150, tellers can:

- Process deposits faster and reduce transaction times
- Have quality interactions that foster stronger customer relationships
- Reduce handling of cash, opportunities for error, and related overtime costs

This affordable 1.5 pocket solution allows for continuous processing with both a reject and a full-function pocket. No need for tellers to stop the machine for suspect or damaged notes. Reduce keying and totaling errors and swiftly transmit deposit totals to your core system. Efficient processing ensures that customers experience the personalised service only a local branch can provide. High quality keeps it running longer.

JetScan® 150

This affordable, high-quality 1.5 pocket solution allows for continuous processing with both a reject and a full-function pocket

Dispatch currency volumes in your cash centre or back office

JetScan iFX® i400 multi-pocket currency scanner

Choose JetScan iFX® i400 for flexible, high-speed, multi-pocket performance, including:

- No manual sorting needed before processing
- Continuous note feeding for uninterrupted processing
- Ultra high-speed processing at 1,000 notes per minute
- Compact, modular tabletop design that fits virtually any space in your back-office or cash centre

In a single pass, quickly count, denominate and authenticate notes.

In a single pass, quickly count, denominate and authenticate notes, also sorting by series, orientation and fitness. Create and save up to six configurations to minimise setup time. Add coin values into batch totals to create a complete accounting record. Export records to your system for fast, accurate posting and clearing.

JetScan iFX i400 scans and sorts faster, is easier to use and is more customisable than any machine of its kind. Its future-ready design makes it possible to scale up the number of pockets as your processing needs change. And, it uses the most advanced counterfeit detection technologies in the industry, for peace of mind.

Today's technologies can go a long way in transforming your branch into an environment that meets the needs of the new branch customer.

Raise the bar on coin-processing accuracy and efficiency

JetSort® LX attended coin sorter

Breakthrough speed, accuracy and ease-of-use differentiate JetSort® LX coin sorters from all comparable solutions. Meet productivity goals for deposit preparation faster and more cost-effectively when re-counting and reconciling redeemed coins from the cash desk or ATMs.

On-the-fly coin discrimination identifies and rejects foreign, counterfeit and damaged coins – even at the highest speeds. And processing is intuitive, so operators work more quickly with fewer errors.

Streamline your coin processing in the cash centre or back office with JetSort LX:

- Proven JetSort reliability and local, dependable service
- Communicates coin totals directly to your internal system
- Processing speed of up to 4,100 mixed coins per minute
- Maximum uptime and 99.995% counting accuracy
- Affordable, ergonomic design

Monitor each step in the process on a full-color touch-screen display. Connect JetSort LX to computers and printers via the data interface to document batch and sub-batch totals and print your results. Deposit accuracy is ensured by screen bag-fill indicators and reject reporting, in real-time.

Expedite foreign currency processing

JetScan iFX® i200 2-pocket currency scanner

Save time counting foreign currency using the fastest, most accurate 2-pocket desktop currency scanner. The JetScan iFX® i200 scanner was designed to help FIs improve their cash operations, by counting down cash 20% faster than any competitive model.

Even smaller cash centres can benefit from multi-pocket benefits at an affordable cost.

- Processes notes at up to 1,600 notes per minute
- Advanced counterfeit detection on select models
- Sorts notes by a selected denomination
- Off-sorts denominations not selected

Coin redemption improves teller efficiency

Money Machine® 2 self-service coin counter

Banks with a self-service machine for coin redemption provide a service that customers appreciate and come into the branch to use. More than 20,000 Cummins Allison coin counters are in operation every day, around the world, providing the fastest and most accurate coin-sorting technology available.

Money Machine® 2 self-service coin counters offer:

- Increased foot traffic to your branch
- Improved teller efficiency
- Enhanced customer service
- Competitive differentiation in your market

Consider Cummins Allison – a change for the better

Fls worldwide depend on Cummins Allison for innovative branch transformation solutions and excellent service. The company consistently scores high marks for quality, reliability and overall value. We are a trusted partner throughout the U.S., Canada, the UK and Europe with a strong presence worldwide.

One of the top banks in the UK uses our equipment throughout their branches. In Germany, the largest CITs use our solutions to process cash and coins in their vaults. In the US, we partner with thousands of banks, including every one of the top 20. We regularly meet with the major Central Banking organisations and work with them throughout the development of new currencies. We are a prolific inventor of new technologies with over 350 patents.

Backed by dependable, local service throughout the UK, you can count on JetScan and JetScan iFX series note scanners, JetSort LX coin sorters, and Money Machine 2 self-service coin counters for all of your cash centre, back office, teller line and self-service coin redemption needs.
